

CSCRL FALL FORUM

The Road Ahead: Technology, Techniques and Tactics
November 7-8, 2019

GREG AIMI

Vice President of Supply
Chain Research -
Technology

Gartner/AMR Research

Greg researches and analyzes best practices and supporting technologies in global logistics, transportation, and distribution. This includes operational planning and execution, organizational development, logistics performance management, and use of logistics outsourcing (3PLs). He advises clients on the impact that these areas have on company performance and helps align their logistics capabilities with demand-driven supply chain transformations.

Greg is a technology pioneer in the development of the supply chain execution (SCE) category of supply chain software, including the integration of transportation, warehousing, labor, visibility, and order management across an integrated supply chain network.
