

CSCRL FALL FORUM

BUILDING A RESILIENT AND ENDURING SUPPLY CHAIN
NOVEMBER 4-5, 2021

ABSTRACT

DIGITIZATION IS THE FOUNDATION OF ENDURING SUPPLY CHAINS

GARY NEIGHTS

SENIOR DIRECTOR, PRODUCT MANAGEMENT, ELEMICA

The trend to decentralize distribution networks combined the COVID driven work-from-home shock accelerated automation of work processes. More digitized companies made this shift adroitly and gained market share. Who knows what the next shift will be, but arguably supply chain organizations that have mastered the art and science of digitization will be better able to adapt to the next shock, and endure.
