### JOHN GIBBONS

Director, Supply Chain  
North America

B. Braun Medical Inc.

John Gibbons is Director of Supply Planning North America for B. Braun Medical Inc., a leader in infusion therapy and pain management, which develops, manufactures, and markets innovative medical products and services to the healthcare industry.

John currently manages a team of central supply planning analysts responsible for facilitating the Sales & Operations Planning process, setting inventory planning policies and targets, and working with the plant supply planning teams to monitor and coordinate the flow of products through our supply network. John is focused on driving innovations in digitization and demand-driven capabilities as well as continuous improvements in B. Braun's overall S&OP planning processes. His prior work included progressive experience in management science, manufacturing operations, continuous improvement, asset management and project management at Air Products (industrial gases and specialty chemicals) and Agere Systems (optoelectronics).

John holds a B.S. degree in Operations Research and Engineering from Cornell University and a Master of Engineering in Industrial Engineering from Lehigh University. He has earned professional certifications of Certified Supply Chain Professional (CSCP) and Certified in Production and Inventory Management (CPIM) from APICS along with Lean Black Belt certifications from Air Products.
