Use coupon code Dis22 at registration to get \$150.00 off your registration fee when you register by March 31.

Lehigh Business Supply Chain Risk Management Index

In the latest report, Transportation Disruption Risk is expected to increase substantially for the upcoming 2nd Quarter 2022 and is the number one concern for supply chain professionals. Interestingly with a score of 89.5, Transportation Disruption Risk has the highest risk index across all risk categories since the creation of the LRMI. There seems to be greater worries about fuel prices, driver shortage, infrastructure and demand volatility.

One of the advantages of examining supply chain risk is to consider how these risks change over time. The table below shows the changing levels of the risk across the 10 different areas of the supply chain this last year. It is also insightful to see that some areas of the supply chain are consistently seen as high risk and other areas of the supply chain as lower risk over the same 1-year time period.
