

## Center for Supply Chain Research at Lehigh

### Lehigh Business Supply Chain Risk Management Index

Cybersecurity is again the highest risk overall at 82.86, but this is a jump of 5 points compared to last quarter. Economic risk is again 2nd overall, and there has been a slight increase in risk to 75.96 suggesting the economy still remains an important risk in the 3rd Quarter. Interestingly, Environmental Risk has become a top 5 risk for the first time.

One of the advantages of examining supply chain risk is to consider how these risks change over time. The table below shows the changing levels of the risk across the 10 different areas of the supply chain this last year. It is also insightful to see that some areas of the supply chain are consistently seen as high risk and other areas of the supply chain as lower risk over the same 1-year time period.
