

MBA Advisory Council

Dr. Prasant (Sean) Pandey
Cardiovascular Specialist,
Lehigh Valley Health Network

I, Prasant "Sean" Pandey, am a board certified physician in Cardiology and Internal Medicine, practicing medicine and cardiology for Hershey medical school, I finished my internal medicine and cardiology training at University of Pittsburgh Medical Center.

It is a privilege to be on Lehigh University Rausch School of Business Advisory Council. Interacting with fellow School of Business alumni has been eye opening, learning how similar problems are solved at different multinational companies. This cross pollination is import in solving problems in the USA healthcare system. Also, I look forward to increasing business school enrollment, especially for medical personnel.

I still enjoy taking care of patients - the "art of medicine." However, medicine is overdue for a "disruptive innovation", particularly in procedures. Transparency is lacking, and the government, CMS, insurance, hospitals and pharma have not done enough to help.

When time allows, I spend time with my five children, attend tennis events and dabble in golf and pickle-ball.
