## SMART, FAST, RESILIENT: PROACTIVELY MANAGING SUPPLY CHAIN DISRUPTIONS WITH AI

CHRIS ANDRASSY  
CO-FOUNDER AND CEO  
ASTRAL INSIGHTS

---

In an era of unprecedented complexity and volatility, supply chains are increasingly vulnerable to disruptions that have cascading effects on profitability and customer satisfaction. This presentation explores how AI is transforming supply chain management, enabling businesses to anticipate, adapt to, and mitigate disruptions before they escalate.

Attendees will learn about cutting-edge technology applications, including predictive analytics, intelligent automation, and agentic systems, that drive resilience and agility across the supply chain. Through real-world examples from the field, this session will demonstrate how companies can leverage AI to make smarter decisions faster, ensuring operational continuity and a competitive edge in an unpredictable world.
