## KEVIN DALBEY

SENIOR OPERATIONS MANAGER OF DATA AND ANALYTICS, LUTRON ELECTRONICS

---

Kevin Dalbey is Senior Operations Manager of Data and Analytics at Lutron Electronics, where he leads a team focused on turning operational complexity into clearer decisions and scalable action, with an emphasis on supply chain visibility, digital enablement, and business performance. His work has included advancing supply chain visibility through digital twin capabilities, strengthening SAP-connected standard work, and deploying practical AI applications in manufacturing and supply chain.

Kevin is known for translating operational complexity into actionable insight, aligning cross-functional teams around end-to-end ownership, and driving scalable improvements that strengthen performance and customer outcomes. His prior experience in new product development and product management allow him to drive this work in operations with a specific focus on Lutron's customers, using fundamental principles borrowed from the engineering discipline.

Kevin holds a Bachelor of Science in Mechanical Engineering from Penn State University, as well as a Masters in Mechanical Engineering and a Masters in Business Administration from Lehigh University.
