

CSCRL FALL FORUM

RISK AS A COMPETITIVE ADVANTAGE: WINNING IN AN UNCERTAIN WORLD
NOVEMBER 5-6, 2026

PANEL SESSION - SPEAKER BIO

EDWARD AGUIAR

FOUNDER AND CEO, TECHDINAMICS

Edward Aguiar is the Founder and CEO of Techdynamics, the company behind techOMS and techSHIP, order management and shipping solutions that power nearly 100 million fulfillment transactions annually for 3PLs, brands, and retailers worldwide.

After decades of building enterprise technology and integration solutions for Fortune 500 companies, Edward founded Techdynamics with a simple belief: shipping shouldn't be treated as just another operational cost. With the right technology, fulfillment becomes a competitive advantage, helping organizations grow more efficiently and deliver better customer experiences.

Passionate about the future of fulfillment, Edward is always exploring what it takes to help organizations stay ahead, from connecting fragmented systems and turning shipping data into pricing leverage to creating technology that evolves with the businesses it serves.
